

Lubrication plays a vital role in keeping your plant running, so you should take every precaution to take care of your system.

Establishing a regular oil analysis programme is key to avoiding component failures and keeping equipment in the best shape possible. From detecting fuel and coolant leaks, to determining additive levels, consistent oil analysis can diagnose a variety of issues that help you prevent breakdowns and failures.

Why Choose DPS?

Established in 1983, DPS is one of the leading suppliers of high quality water and wastewater pumping, treatment, screening and infrastructure solutions throughout Ireland.

We have developed and nurtured long-standing relationships with many globally recognised brands to ensure that we can offer our clients the best available technologies to meet their specific needs.

The Benefits

Lubricant Performance Breakdown

Early Identification of Potential Problems

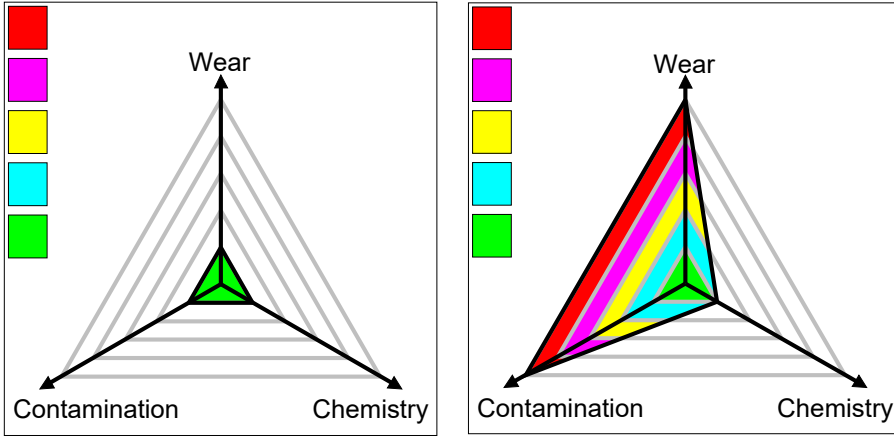

Fewer Repairs Less Downtime

Longer Lasting Equipment

Cost Savings

Detailed Reporting

Lubricant Performance Breakdown

Comprehensive analysis of the oil in your equipment provides a detailed breakdown of your lubrication system's performance.

Identifying Problems Early

Knowing ahead of time that an issue may occur with your equipment can save time and money. Oil analysis provides an in-depth view of the lubricant in your machinery. With consistent oil testing, small issues can be identified and dealt with before they become big problems.

Fewer Repairs, Less Downtime

Most big problems with machinery start small and grow increasingly worse over time. Larger problems often require extensive repairs and often include significant downtime for your equipment and your business.

Longer Lasting Equipment

Regular check-ups and maintenance greatly increase the useful life of your equipment and foster increased productivity for all your plant's operations.

Cost Savings

Oil analysis can help your machinery run smoothly and your business stay strong.
